APPLICANT'S COMMENTS

The examiner's statement of reasons for allowance does not properly track the scope of the claims. No claim specifies the combination recited by the examiner. However, a minor modification to the statement can suffice to cause the examiner's comments to properly track the claims. Applicant suggests that the following statement properly reflects the examiner's reasons for allowance of the claims, consistent with the scope of the allowed claims. Added words have been underlined. No words are stricken.

--The prior art of record does not teach or reasonably suggest a pressure-differential liquid raising system comprising a pressure differential system adapted to supply a first pressure differential between a system inlet at a first elevation for receiving liquid and at least one cell at an elevation between the system inlet and a system outlet at a higher elevation than the first elevation and to supply a second differential pressure between the first cell and one of a cell located downstream from the first cell and the system outlet.--

A single check for \$1000 is enclosed herewith to pay both the issue fee and the publication fee. No other fee is believed to be due. Should any other fee be properly due, or if any refund is due, kindly charge same, or credit any overpayment, to Deposit Account 23-2130.

Please feel free to contact me with any questions, comments or concerns, at the telephone number listed below.

Respectfully submitted,
Brian Gridley
